Period \_\_\_\_\_

**Point Value (10 points)** The grading rubric is on the reverse side of this assignment sheet!  
Using the Illustrator entitled “Silk Screen Functions.ai” provided in your “junior” folders located on the server follow the prompts given to complete the assignment.

## INSTRUCTIONS: Identify the basic functions of a screen printing system (11.1.1)

Using the knowledge we’ve gained today, arrange the basic functional steps used in the silk screening process by moving the correct images on top of the “step” they represent. Once you have the images in place use the text boxes below each image to define the process above. Pay attention to the layers!

When you have completed; save, then print the file to the color printer, make sure your name is in upper right corner in the space provided.
